

Tema 2 - Entrega ejercicios 2.1, 2.2 y 2.3

NDGt02e02:	2
NDGt02e03:	3

NDGt02e02:

2.2. Crea un primer proyecto SpringBoot a través del asistente de VSC. Incluye las dependencias starter spring-Web, starter-Thymeleaf y DevTools, en Java 17, empaquetado jar. Configura para que escuche por el puerto 9000 y que solo contenga una página index.html con un titular “Hola mundo”. Ejecuta la aplicación y comprueba en el navegador que funciona correctamente.

En este ejercicio fue bastante sencillo, no me costó mucho.

```

Hola mundo

NDGt02e03:

2.3. Crea un segundo proyecto a partir de <https://start.spring.io> con las mismas características que el anterior. En este caso consistirá en una web estática de tu equipo favorito del deporte que prefieras (también puede ser de un grupo de música o un director de cine, etc.) crea una estructura de cuatro páginas HTML estáticas:

- index.html : descripción general del equipo, historia, etc.
 - palmares.html : lista de títulos obtenidos
 - galería-fotos.html : fotos relevantes del equipo.
 - enlaces-externos.html : URL a otras páginas: página oficial del equipo, Wikipedia, etc.
- Configúralo para que se ejecute sobre el puerto 9000. Añade alguna imagen a todas las páginas.

En este ejercicio fue bastante sencillo, no me costó mucho.

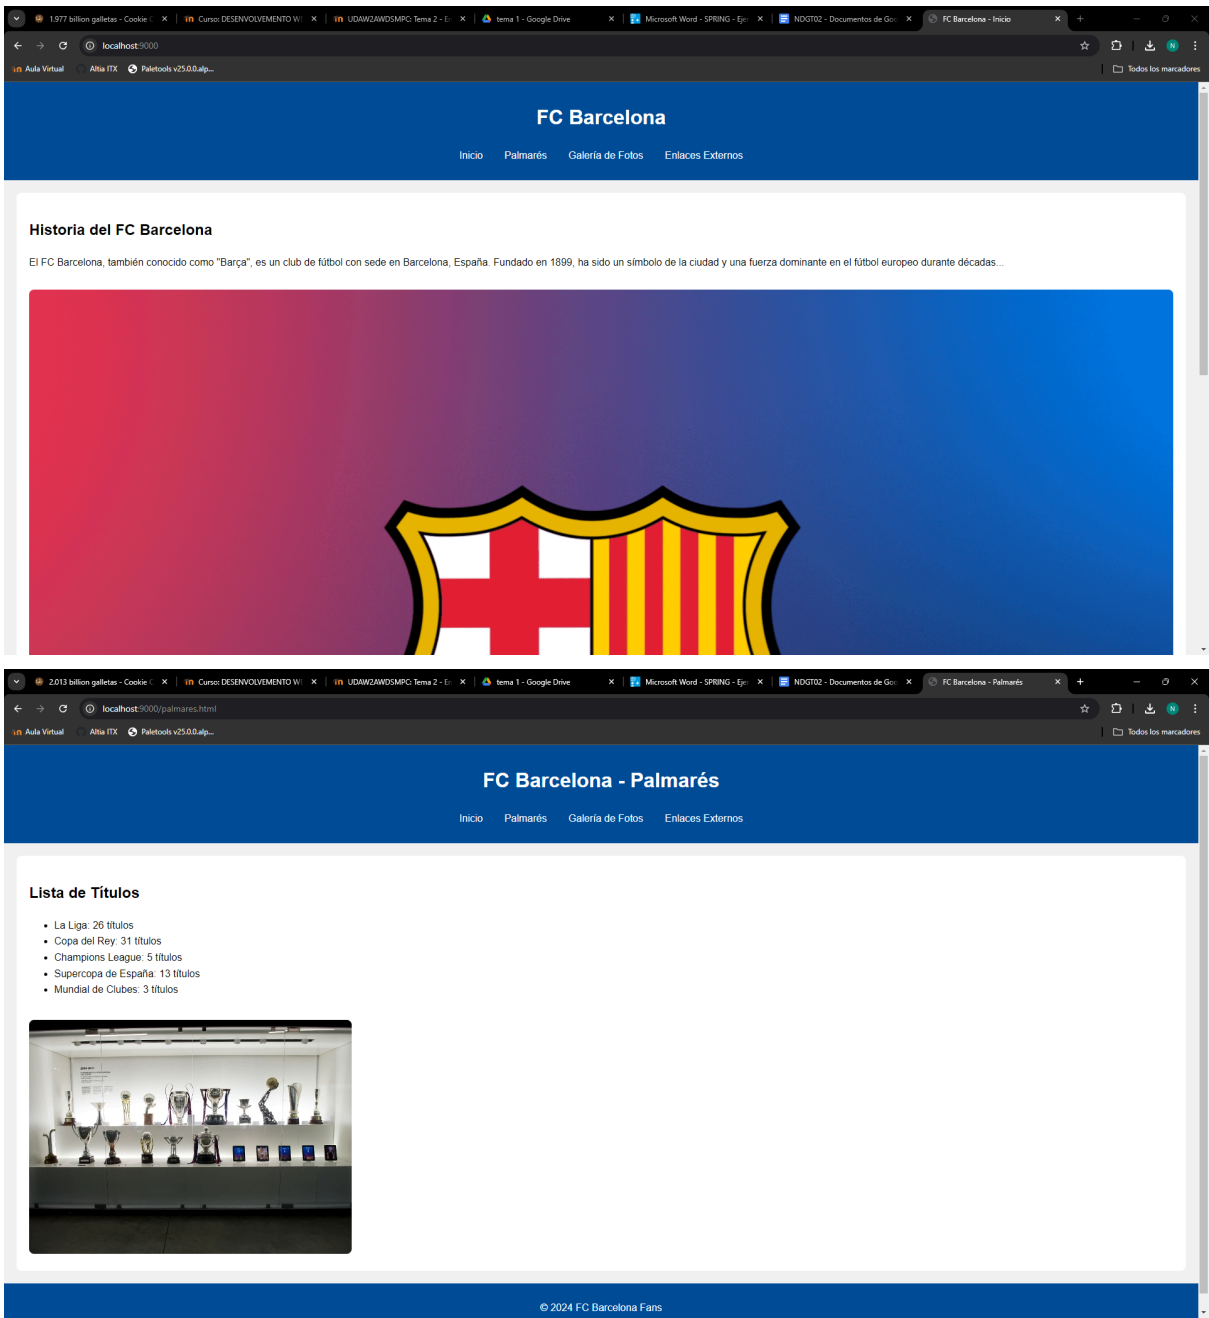

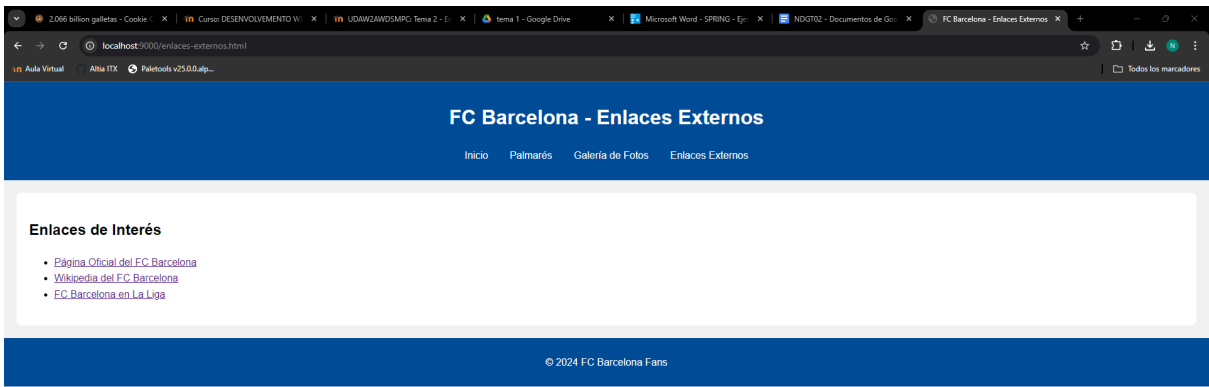

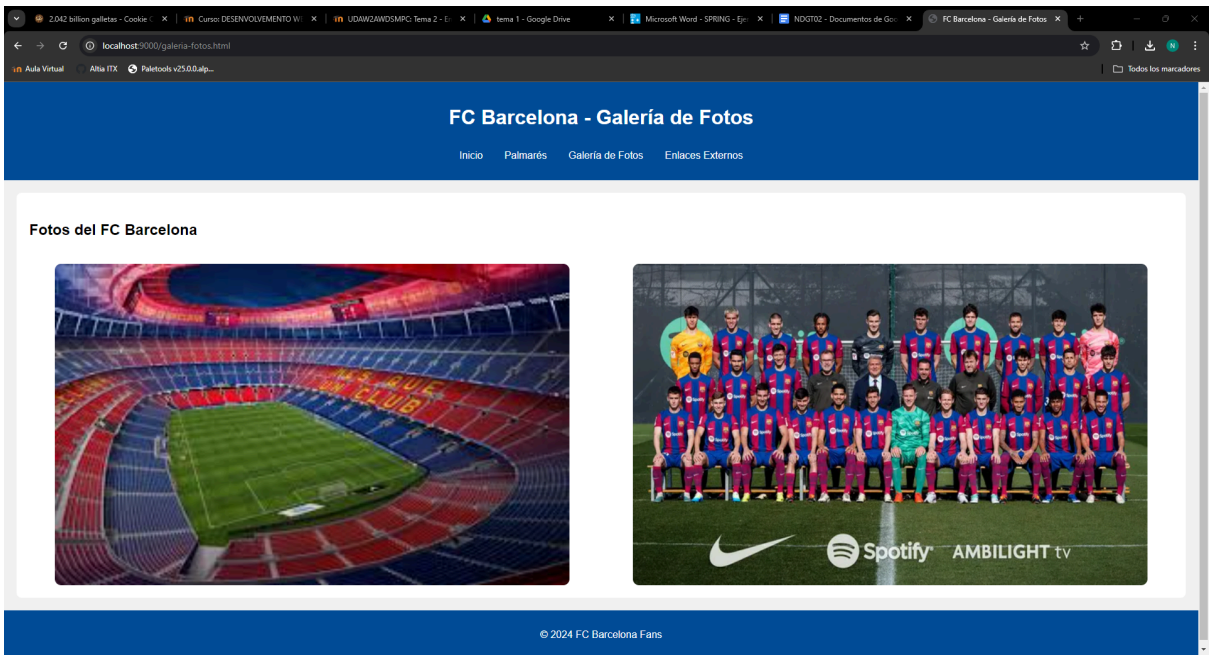

```
